WELCOME TO THE WORLD OF PINBALL! In this project, we implemented the RobotDog and the Master Machine, using robots and a servo. Like the classic edition, we removed the pinball platform and the player, and gave them a new form and appearance. We did a simulation and actually, the robot is very important since it is what goes out into the world and not only gives the classic pinball game. We have created a simulator for testing, to make sure that everything works as it should, and that the robot does not get tired and gives us a score that is even more consistent. At the end of the project, we have developed games that depend on the robot movements, for example: - Robot Dog follows the player. - Master Machine keeps score. - Master Machine maintains a score with the robot. - Robot Dog keeps score with the Master Machine. - Robot Dog maintains score with the Master Machine. - Master Machine keeps score with the c9d1549cdd

As most of you already know about my illustration projects, this time I decided to make a small collection of images, which can help to make your own drawings, or develop your artistic skills. Here is the bundle of 4 drawing exercises, which you can download to play with in order to learn how to draw with Paint Tool SAI! Warning: Even if the tutorials are pretty basic, you should always practice. Never try to complete the tutorials in one session, as you can't move from the place where you stop. Cosplay Crew IC: Ava What is your favorite color? AU: pale blue Tell us a little about yourself AVA: Hey guys, my name is Ava, just a carpool mom, like anyone else. I work full time, and I train at a gym 4 times a week with my trainer, and I work part time at a video store. I have a 3 year old, and a 1 year old, and i love them both! What is your occupation? You are in a multiverse, and on a 6 month adventure through the cosmos. What do you do? While traveling, you stumble upon a strange machine. What does it do, and why bother you? Cosplay Crew Favorite Genre: Ava: Parody, satire, tragedy comedy Why this cosplay you decided to do? Ava: I wanted to cosplay as Snow White for Star Trek Las Vegas for the Holodeck stage, but they already had the correct costume and the animation wouldnt be as much fun as dressing up as the original characters, so I picked out a cosplay instead. Ava: So i got my costume, decided to do it, and got pretty much into it. Ava: For starters, all the other cosplayers were wearing full contact lenses, and had hard plastic pieces for their eyes and hair, and their bodies were all made with muscles. And my arms looked nice, but I didnt really want to get them covered in it, because one arm would have been just like another body part. I went for a "home work tentacle" look, but im a furry lover, and im more of a humanoid cosplay. I really like Grendal and Vennel from Starcraft, and Scooter from Metal Gear Solid. Or at least, i think that is them. AVA: I was lucky enough to run into a furry convention down in San Diego, and I should have been there, because it was perfect, 8 hours free, and I could haxe off. Anyway, I had a blast. I just love all these old school games and series, and I love pissing off manly men. Too bad no furries are friendly, they might haxe off all your ass. DX: Last month, we sent cosplayer and Pyxie Cast to the Star Trek Las Vegas convention after
